(54) Title: A MOTOR VEHICLE PROVIDED WITH A FOLDING TOP

(57) Abstract: Described herein is a motor vehicle (1) provided with a folding top (6), which is supported by a frame (5) of the motor vehicle (1) and can be set in an open position or in a closed position; the folding top (6) has an element (7) of covering, which is substantially horizontal in the closed position and is hinged at the rear to the frame (5) of the motor vehicle (1) so that it can rotate about a first horizontal axis (8) between the open position and the closed position; the element (7) of covering is made up of two half-elements (11, 12) which are connected together in such a way that one half-element (11) of front covering is folded on a half-element (12) of rear covering when the folding top (6) passes from the closed position to the open position.
